Station, and take RideOn Route 59 TOWARD ROCKVILLE and get off from “Calhoun Place” stop.
Standish Place is next to the Bus stop. Our venue is within 2 min of walking distance from the stop.
Summary

In September 2014 the president of Liberia asked the president of the United States to send help in the fight against the Ebola virus epidemic. President Obama sent a variety of uniformed and civilian resources from the US government. One of these entities was a group of officers from the United States Public Health Service Commissioned Corps. They were to configure and staff a portable hospital to treat this patient population. This hospital was designed to be used in remote locations by the USAF. I was part of the first team that went to Monrovia Liberia to carry out this mission. The US Army had assembled the mobile hospital provided by the USAF but it had not been modified to handle Ebola virus patients.

We spent the first two weeks configuring the hospital and going through scenarios that might occur once actual patients were referred to us. Over the next 7 weeks we treated patients with Ebola virus disease and had a survival rate of approximately 50% which was slightly better than average. There were many challenges to house and feed the team as well as to activate and supply the hospital. This presentation will cover this process from the President's original announcement on September 16, 2014 until the team returned on December 20, 2014 after turning the facility over to the second of four teams that manned it.

Speaker’s Bio: LCDR Philip Lafleur, MPAS, PA-C

- Born and raised in Massachusetts, and lived in the Midwest and the South for over 30 years
- Physician assistant with a BS from Trevecca Nazarene University (1998) and MS from University of Nebraska (2001)
- Joined USPHS in 1999 and spent 9 years with the federal bureau of prisons
